nishitasarker2005

Location: Rangpur, Bangladesh

CAREER OBJECTIVE

To secure an entry-level position as a Web Developer where I can leverage my proficiency in modern frontend layers (React.js, Next.js, Tailwind CSS) and robust backend fundamentals (Node.js, Express.js). Aiming to apply structured problem-solving models and analytical thinking from my statistics background to resolve complex application performance, responsive UI bottlenecks, and state management challenges.

TECHNICAL PROJECTS & PROBLEM SOLVING

QurbaniHaat — Digital Marketplace Platform

May 2026

Next.js, DaisyUI, Tailwind CSS, Responsive UX Architecture, JavaScript(ES6+)

- **Problem Solved:** Mitigated layout shifting and un-optimized component scalability across multi-device viewports for regional digital trading platforms.
- Engineered high-performance atomic UI blocks including dynamic multi-tier Navbar and Footer segments using DaisyUI components and native Flexbox/Grid classes.
- Optimized component rendering cycle times by abstracting repetitive presentational sections into unified modular frontend utilities.

KeenKeeper — Analytics Tracking Application

April 2026

Next.js, React Client Engine, Tailwind CSS, Chart.js, JavaScript(ES6+)

- **Problem Solved:** Addressed user engagement visual clarity issues by mapping complex interactive datasets into easily interpretable graphical representations.
- Dedicated 25+ hours designing client-side analytics dashboards; integrated Chart.js configurations to visualize user data feeds cleanly.
- Managed client-side navigation paths and smooth transitions using Next.js advanced app-routing parameters.

Digitools-Platform — Async Digital Hub

March 2026

React.js, Tailwind CSS, Async Data Hydration, REST Interfacing, JavaScript(ES6+)

- **Problem Solved:** Resolved asynchronous race conditions, prop-drilling, and inconsistent client data syncing across nested components.
- Implemented strict "Lifting State Up" state synchronization protocols to ensure an immediate, reliable application state tree.
- Structured network fetching structures utilizing native asynchronous functions to eliminate pipeline page locking during active API transactions.

TechWave — Media Platform Concept Layout

Jan 2026

HTML5 Semantic Elements, Custom CSS Layouts, JavaScript(ES6+)

- **Problem Solved:** Resolved cross-browser container overflow and un-synchronized grid scaling on extreme widescreen/mobile breakpoints.
- Created a pixel-perfect, highly responsive layout with refined custom margin structures using custom flex metrics.

TECHNICAL SKILLS

Frontend Stack

React.js, Next.js, HTML5, CSS3, JavaScript (ES6+)

Backend Basics

Node.js, Express.js, REST API Architecture

UI & Styling Engines

Tailwind CSS, DaisyUI, Modern Flexbox/Grid Systems

Database Control

MySQL, MS Access, SQL Querying & Constraints

Version Control & Deploy

Git, GitHub, Vercel, npm Management

STATISTICAL FOCUS

- Bivariate Data Analysis
- Linear Regression Modeling
- Theoretical Probability Frameworks
- Data Transformations

EDUCATION

B.Sc. (Honours) in Statistics Begum

Rokeya University, Rangpur (BRUR)

(2024-present)

CORE METHODOLOGIES

- Atomic UI Component Engineering
- State Machine Sync & Lifecycles
- Asynchronous Resource Fetching
- Quantifiable Problem Diagnosis

LANGUAGES

Bengali: Native

English: Professional Working Competency
